ABSTRACT

A mobile ring (1) connecting/release device (8), in particular for a high mast with a tower with predetermined height and a fixed supporting head (3) at one end of the tower. The device (8) comprises connecting means attached to the mobile ring (1) for removably connecting it to the fixed supporting head (3). In an original way, these means have rigid contact elements (9) shaped in such a way that they rest on corresponding supporting head (3) contact portions (10).
